Flashcard Organizer - How to Use

For Teachers and Learners | Four Seasons & Weather

1. Choose your cards

Open Flashcards and select ORGANIZE. All 70 flashcards remain available. Drag a card to change its position. On tablets, select a card and use MOVE LEFT or MOVE RIGHT if dragging is difficult.

2. Choose how many to present

Use Cards to show to choose 1 to 40 cards. For example, choosing 15 presents only the first 15 flashcards in your arranged order. Cards in positions 16 onward remain available in the organizer.

3. Present your flashcards

Press PRESENT ORDER. Cards appear one at a time in your chosen order. Use Previous, Next, or Full Screen as needed. Return to ORGANIZE whenever you need to change the order.

4. Save your set

Type a name and press SAVE MY SET. Only the first selected number of cards are saved; the limit is 40 per set. You can save up to 3 sets per lesson using your Pawn to Professor account.

5. Open or delete a saved set

Choose your set in My Flashcard Sets. Press OPEN SAVED to restore it, or DELETE SAVED to remove it. Use RESET ORDER to restore the default order.

6. If saving does not work

Open the lesson through Pawn to Professor while signed in, rather than directly from GitHub Pages. For offline classroom teaching, you can still arrange and present cards, but cloud saving needs an authenticated connection.

Tip: Move the cards you want to the front first; then choose your presentation count. This is faster than individually hiding the remaining cards.
